Reasons for Allowance

1. Claims 1-8, 12-23, 27-40, 43-65, and 68-86 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art of record is Fields et al. (U.S. Patent No. 5,111,391). While Fields teaches the underlying scheduling methodology recited in independent claims 1, 31, and 58 (i.e., assigning an arbitrary number of tasks from among a plurality of tasks based on rate per task and the details thereof), Fields does not disclose or suggest the application of such a scheduling methodology to allocating specific pharmacy-related tasks based on a resource allocation model that includes entities with variable attributes having variable quantities that transform through at least one network of nodes, wherein each node of the at least one network of nodes includes an associated set of attributes and parameters, the attributes include the resource, and each node or at least one network of the node exists for a predetermined period of time. This combination of features is recited in claims 1-8, 12-23, 27-40, 43-65, and 68-86; therefore, claims 1-8, 12-23, 27-40, 43-65, and 68-86 are deemed to be allowable over the prior art of record.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3623

Shioda et al. (JP 2003-203121 A) -- Discloses a workflow system for use in a pharmacy.
